

I am writing in concern of the changing of the Low Power FM changes that are being considered and how it will affect our community. Presently there are two Christian radio stations in the area one is going out of business and the other is K-love. K-love operates on the LPFM system. If Omaha loses K-love it will affect the churches in the area to get information on the radio at no cost to us about events in the local area. In an age of eroding values K-love is a beacon of light shining in a darkening world. K-love offers free advertising for non-profit organizations and offers a positive and encouraging message for those suffering. They also have a 24 hour hotline for prayer for those in need. I would ask you to reconsider this change in the LPFM format. Thank you.
